

A new commercial laboratory for the technological study and authentication of paintings in Geneva, Switzerland, is looking to appoint a Junior Research Scientist (permanent position, 50 % part time in the first instance).

Candidates should have the following profile :

- Postgraduate degree in chemistry or a related subject and some experience in the technological investigation of works of art ; A conservator with significant experience in the scientific investigation of paintings (X-radiography, infrared reflectography, X-ray fluorescence, optical microscopy for pigment identification) would also be considered.
- Languages: good English and at least some French are essential, other languages would be an asset
- Ability to work autonomously, reporting to one of two senior scientists at the laboratory
- Preparedness to use X-rays as part of your work
- **Valid working permit for Switzerland**

This is an exciting opportunity to work at the interface between science, conservation and the art market, in a city consistently considered to be among those with the best quality of life in the world. The laboratory features new scientific equipment of the highest standards.

Salary commensurate with experience. The position will remain open until filled.

Please send your CV to Kilian Anheuser (kiliananheuser@yahoo.fr) and Yan Walther (ywalther@faei.org), who will also be happy to answer any questions informally.
