

A184 - COIN (IMPERIAL ROMAN)

Identification

Sample: A184
Card reference: S81
Origin: Lorraine
Location: n/a

Description

Grains do not show preferential orientation.

Figure captions

A184.1

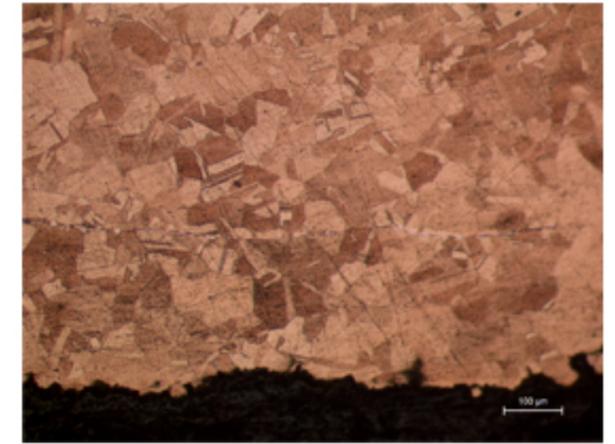

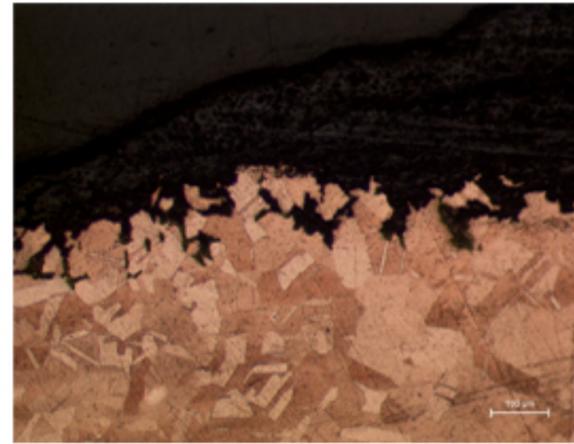

General view: well recrystallized grains with annealing twins, no evidence of cold work after annealing (sample etched with aqueous FeCl_3).

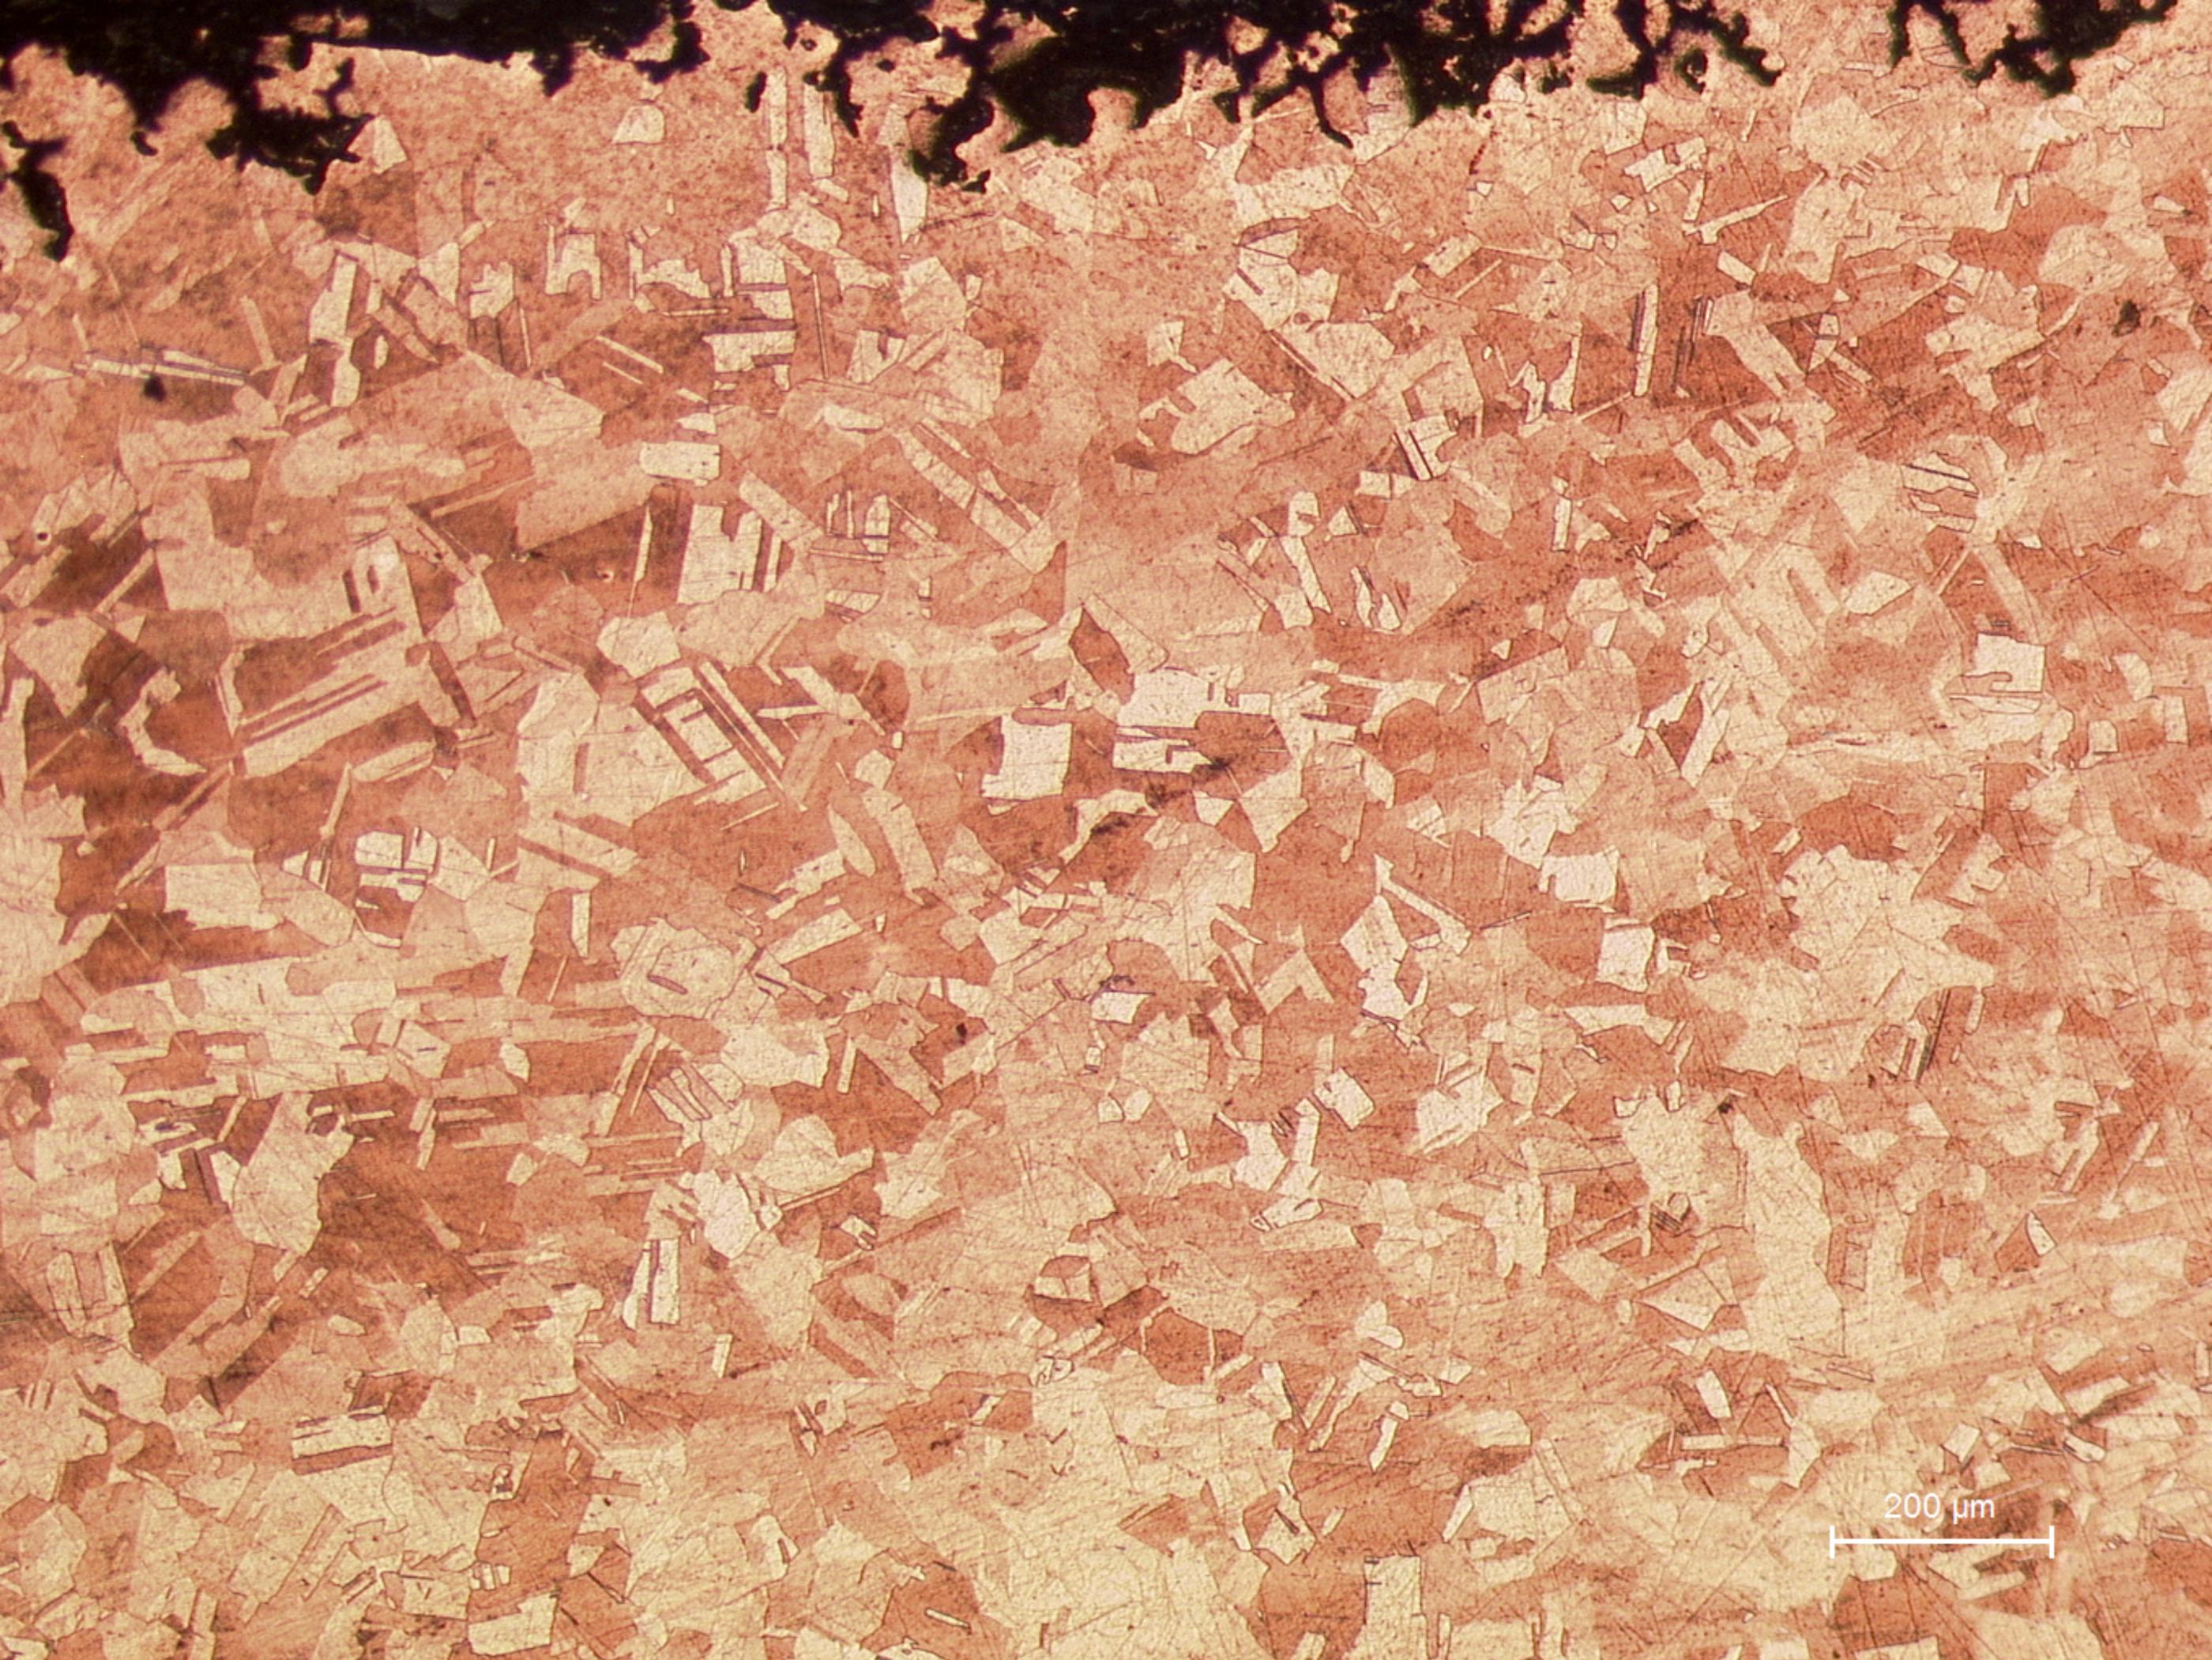

A184.2

Detail showing internal corrosion progressing intergranularly (etchant: aqueous FeCl_3).

A184.3

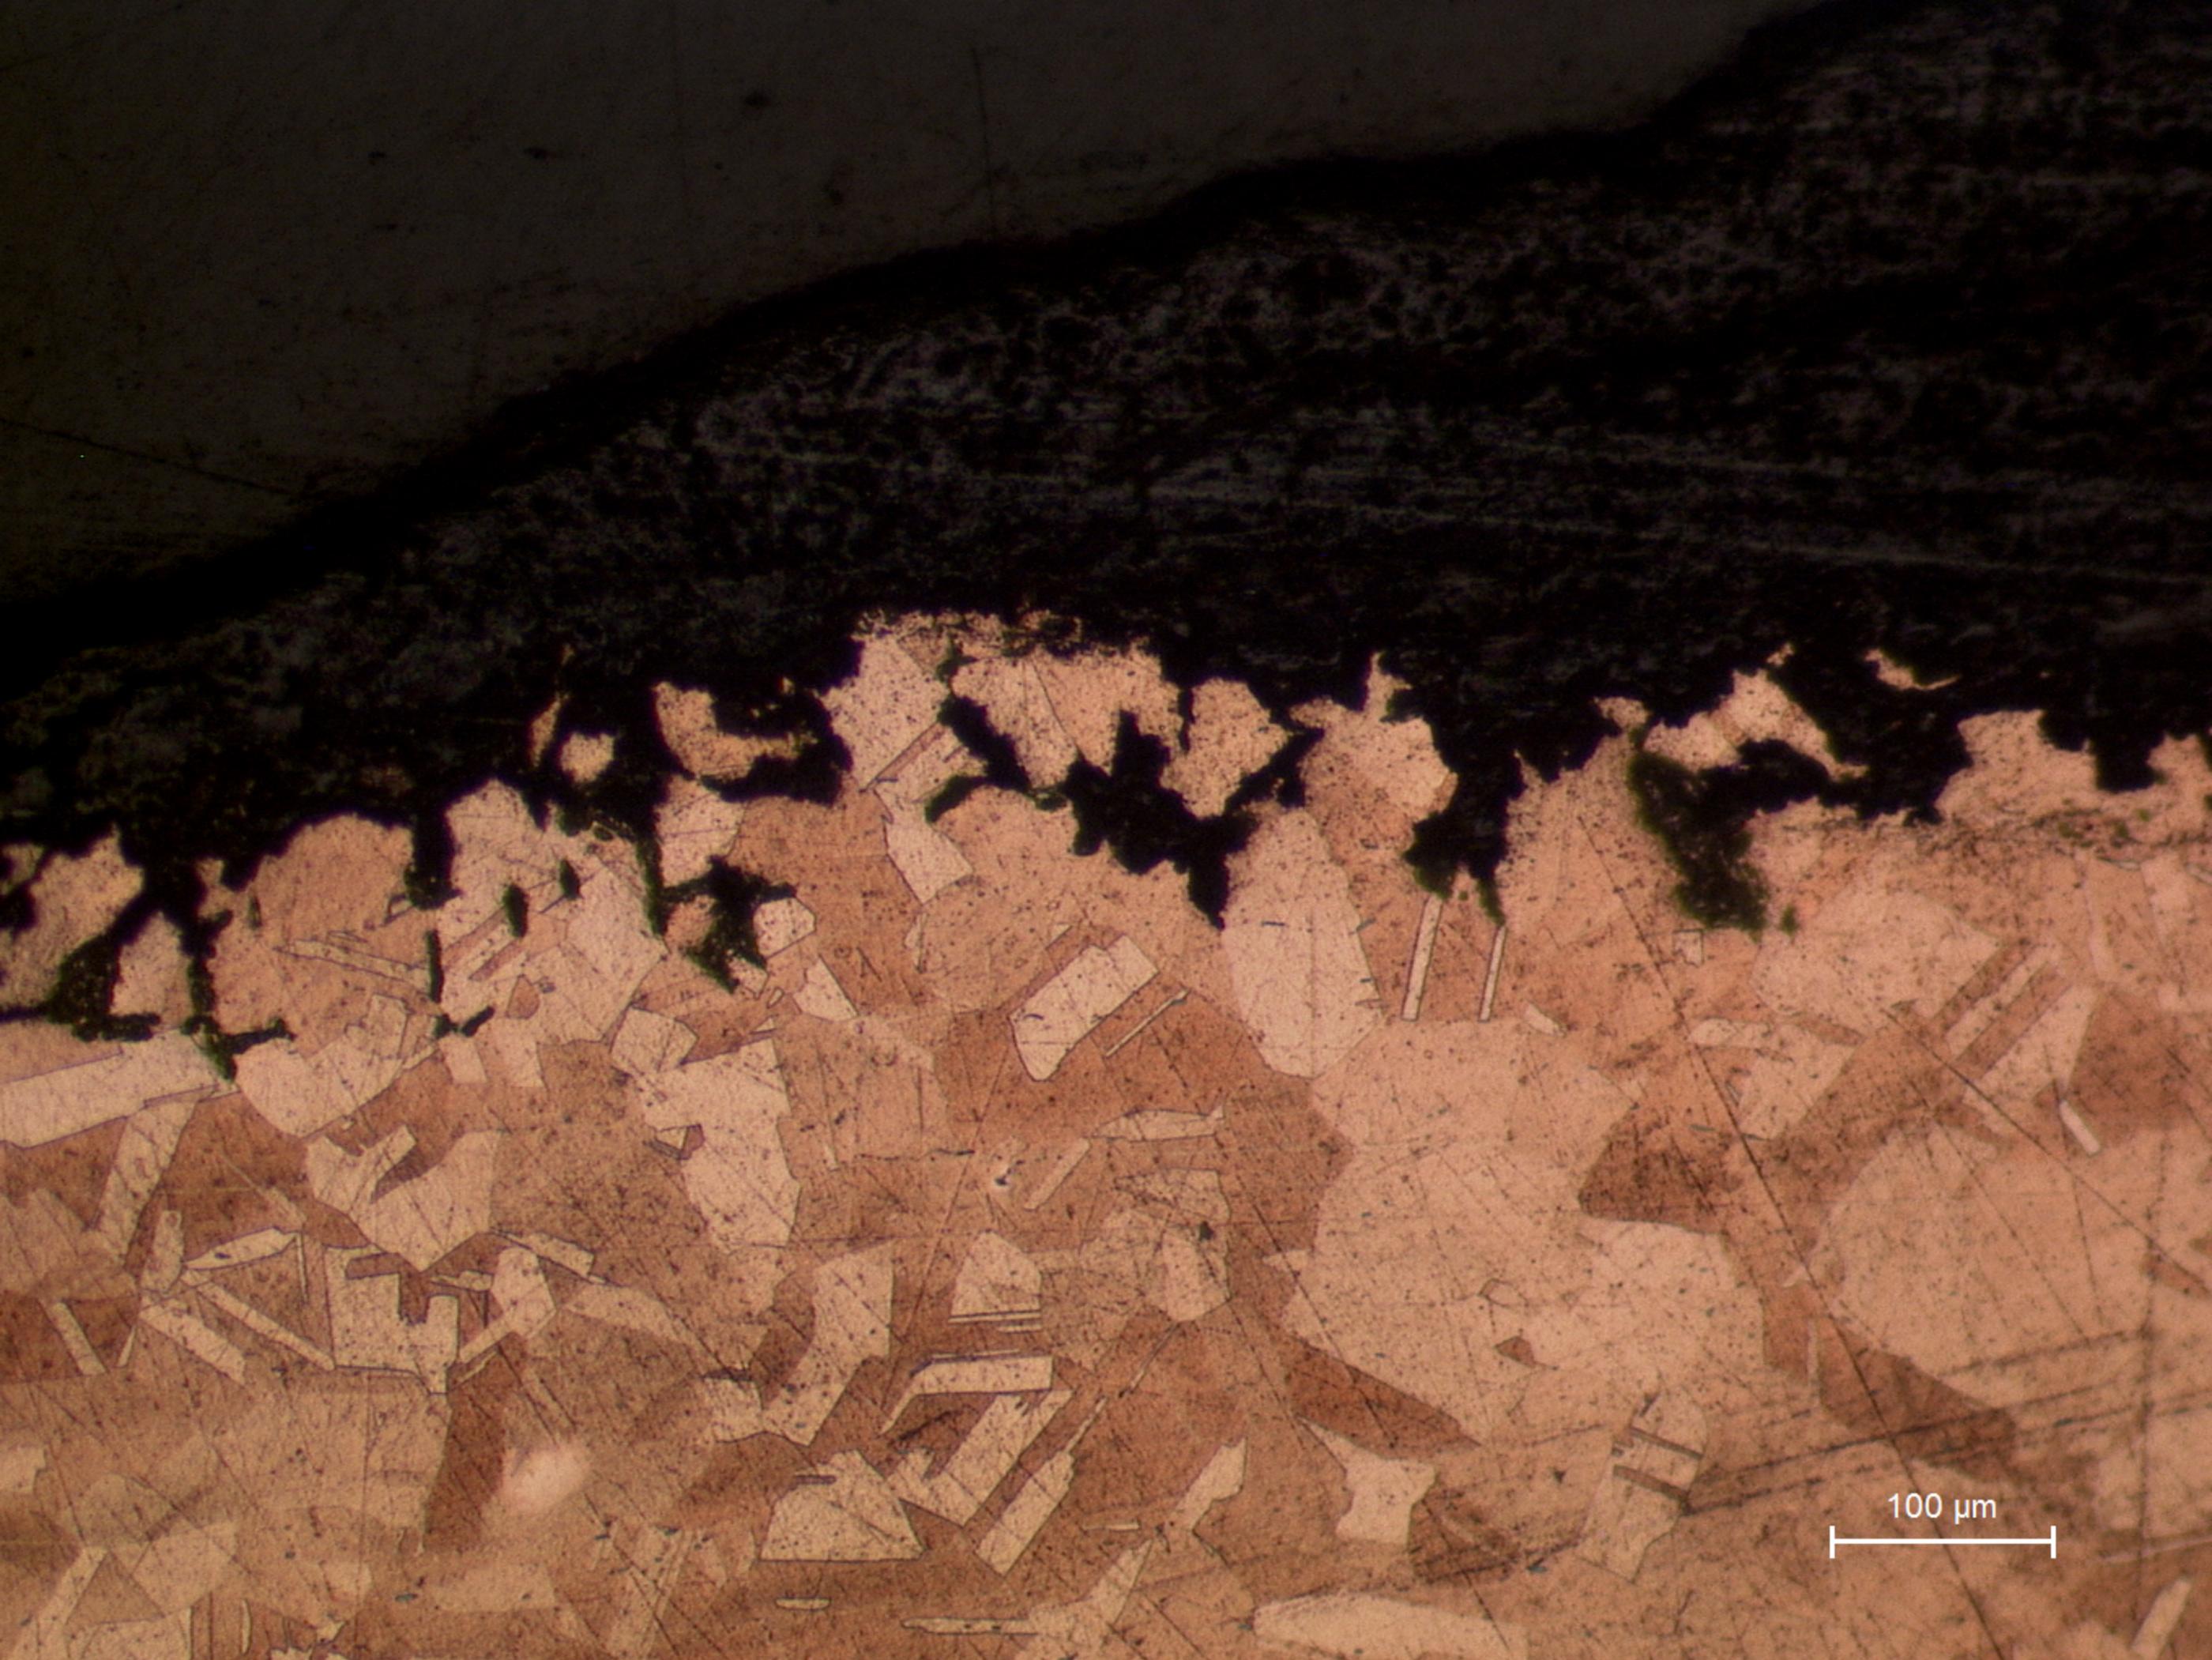

Detail showing a crack parallel to the surface (etchant: aqueous FeCl_3).

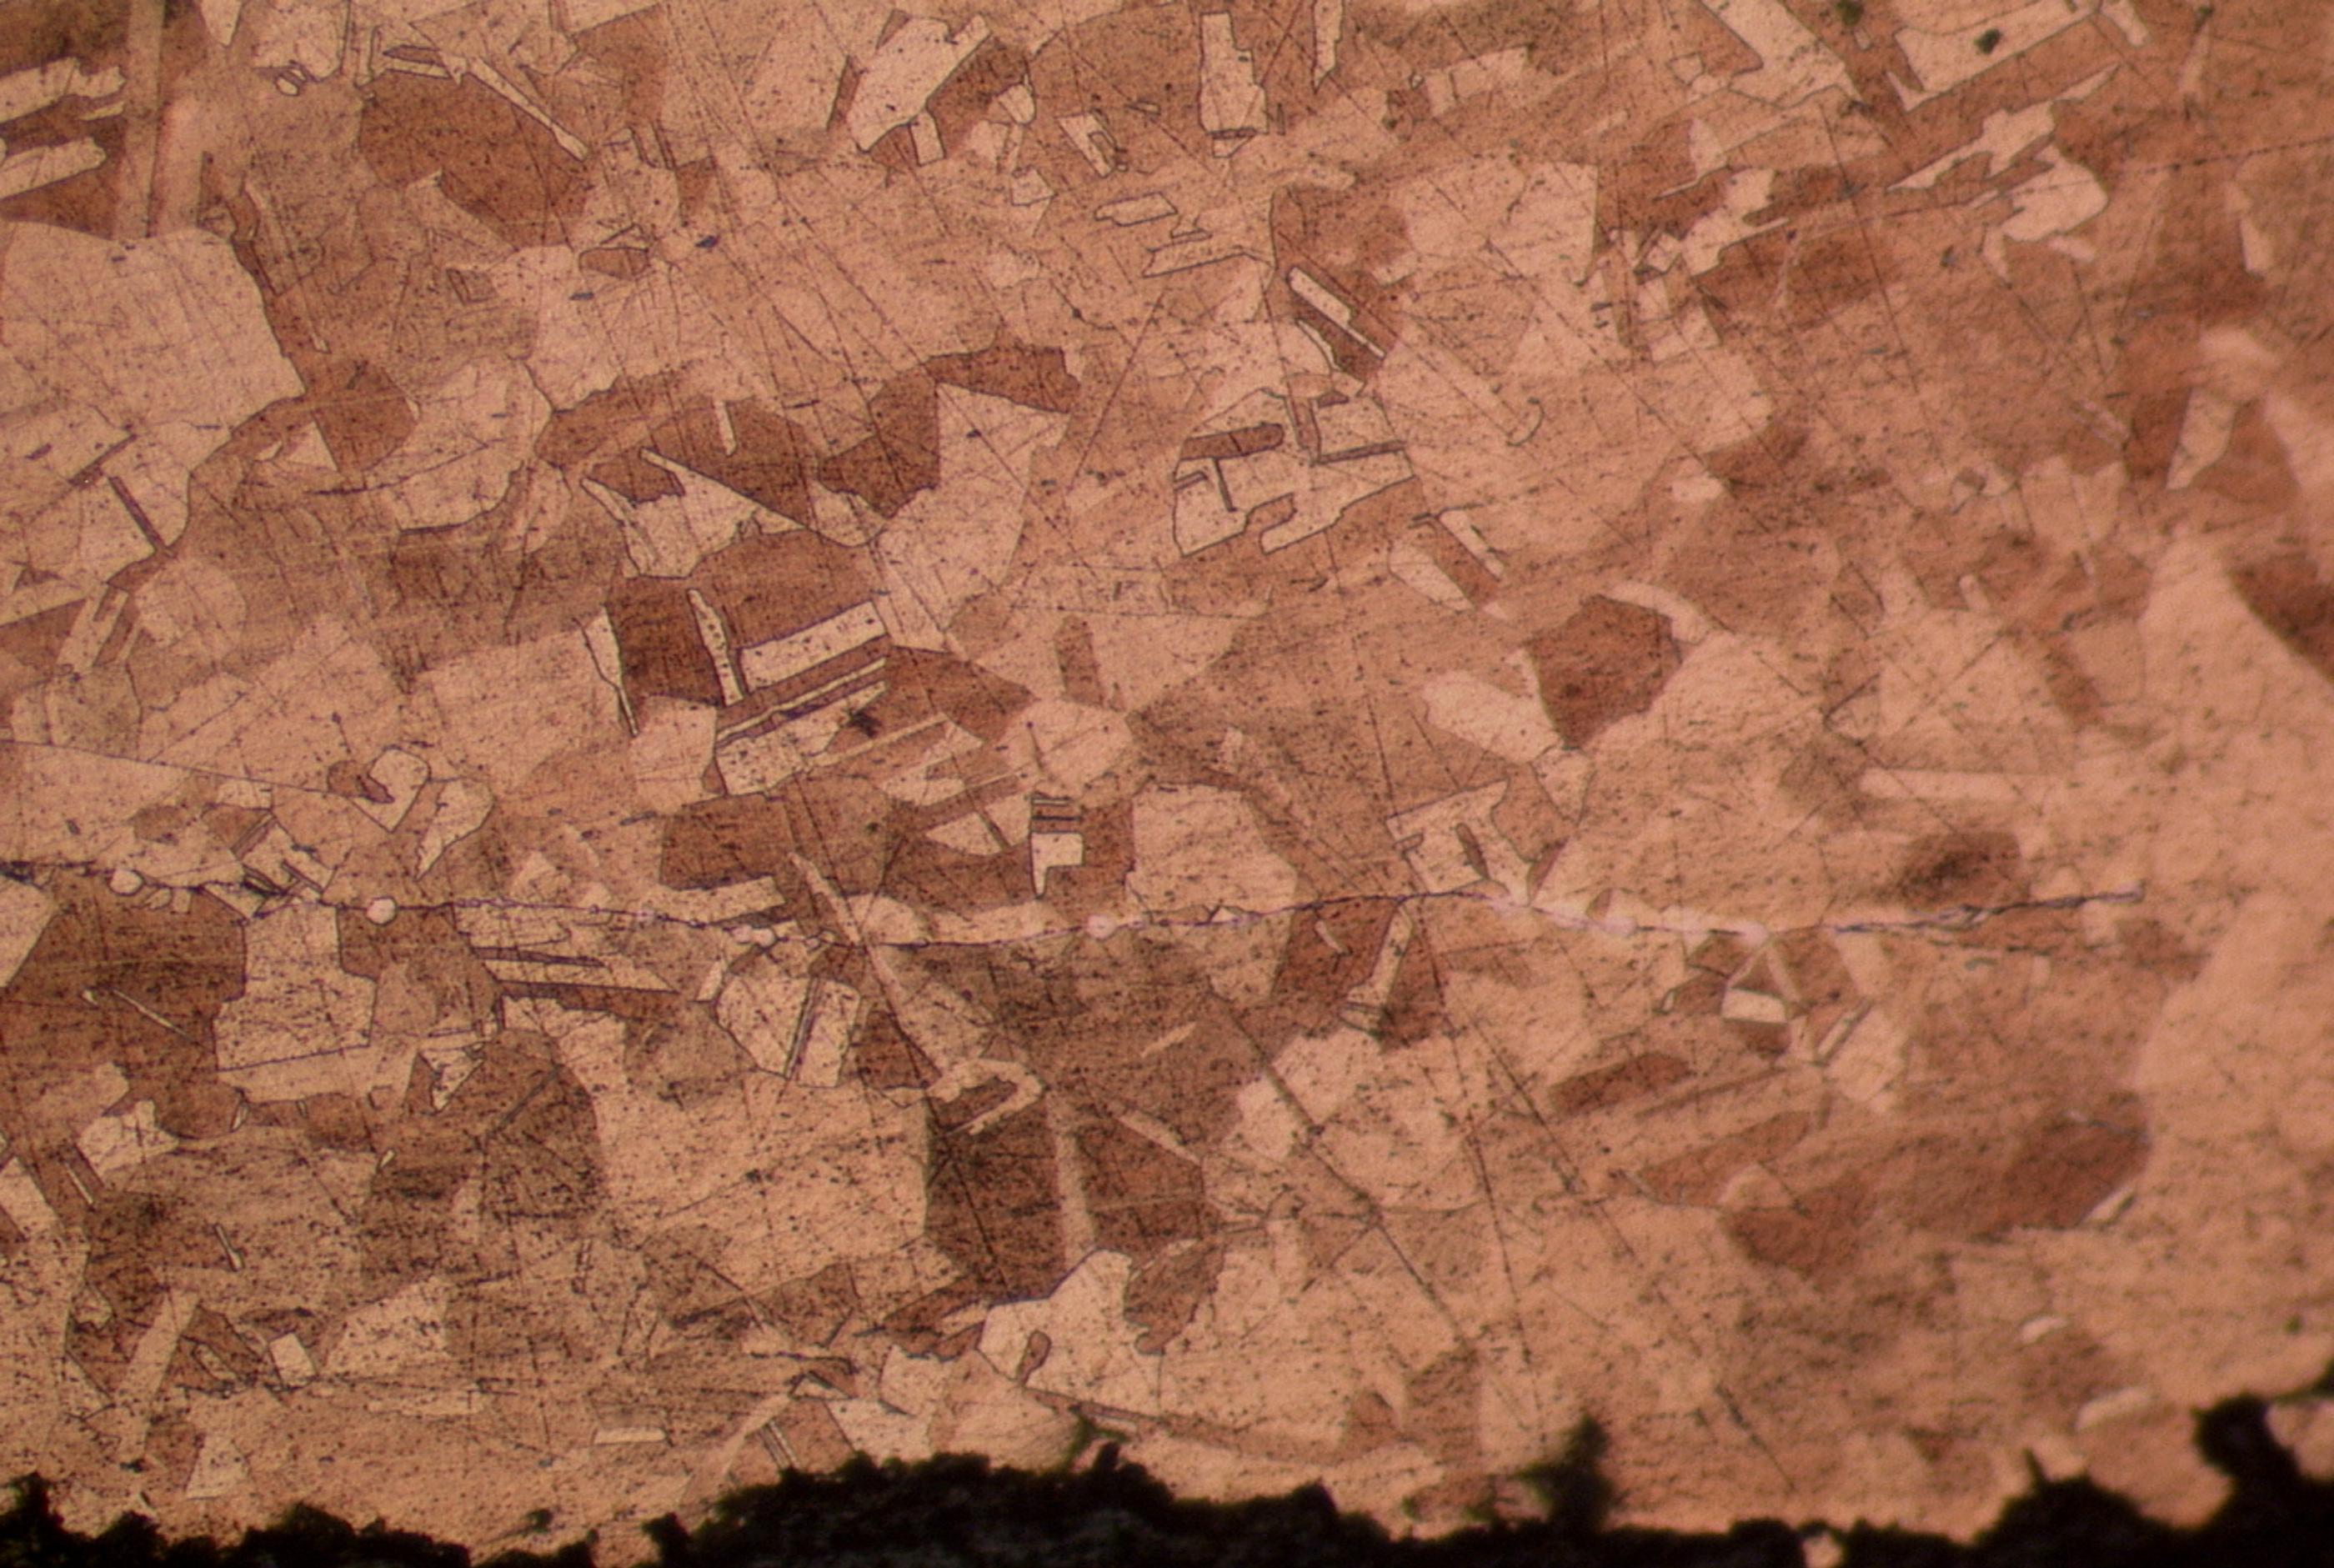

200 μm

A184.1
General view: well recrystallized grains with annealing twins, no evidence of cold work after annealing (sample etched with aqueous FeCl_3).

100 μm

A184.2
Detail showing internal corrosion progressing intergranularly (etchant: aqueous FeCl_3).

100 μm

A184.3
Detail showing a crack parallel to the surface (etchant: aqueous FeCl_3).
